ARNOLD URBAN DISTRICT COUNCIL

Annual Report 1972

Arnot Hill House,
Arnold,
Nottingham.

To The Chairman and Members of the Council

Herewith the Annual Report for 1972. The state of the public health of the area remains good and conforms to the requirements of the Department of the Environment.

The estimated mid-year population is 34,280, an increase of 1,150 over 1971.

The birth rate per 1,000 population was 15.1. The death rate was 11.8.

Major causes of death were ischaemic heart disease, cerebro-vascular disease and malignant disease. Deaths from malignant disease increased from 61 to 86 - 7 of those deaths occurring in people under the age of 35 years.

Deaths due to ischaemic heart disease increased from 69 to 74, 11 of them occurring in people under 55 years of age. The deaths in males remained static but in females the figure increased by 15%.

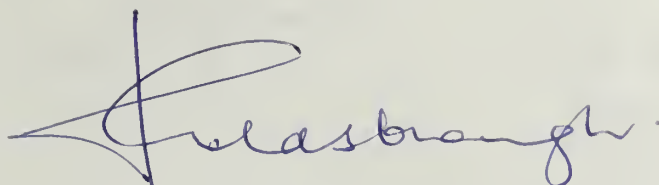

Lung cancer deaths in males almost doubled - 18 (10 in 1971).

With regard to the notifications of infectious diseases, it will be noticed that under food poisoning, a total of 4 cases were notified to the department. This gives no indication of the outbreak of food poisoning that occurred in the urban district in November, 1972. On casual information from members of the public, an investigation was commenced to determine the extent and origin of the infection. All together, 43 cases were confirmed and the outbreak was traced back to a hotel - outside the Nottinghamshire area. The infection was caused by salmonella organisms from frozen poultry - inadequately thawed and cooked. This, I trust, will serve as a reminder to the public in general and the catering trade in particular that no care is too great to prevent food poisoning occurring in the community. I am indebted to Dr. E. R. Mitchell, Director of the Public Health Laboratory, for his help and advice with regard to this particular outbreak as well as for his help to the department throughout the year with regard to other public health problems.

I write this report at a time of change, both in local government and in the National Health Service. Arnold Urban District Council will no longer have a Medical Officer of Health but the proper officer in the new Gedling District will be the District Community Physician for the Area Health District to be known as Nottingham South Teaching One.

Many environmental problems of the district have been resolved but many, particularly with regard to housing and pollution still require attention and I would hope that the new authority will make progress at a rapid rate.

It remains for me to thank the Staff of the Authority and in particular the Health Department staff for their courtesy and co-operation since I came to the authority.

VACCINATION & IMMUNISATION

Vaccinations and Immunisations are carried out at the Arnold Health Centre during child welfare sessions by the Department of Medical Officers of the Nottinghamshire County Council.

MEASLES

456 children were vaccinated against this disease in 1972; many more need to be protected before the true effect can be seen - namely eradication of the disease in our child population.

POLIOMYELITIS

404 children completed the 3 dose course of oral vaccine.
504 children received reinforcing doses of vaccine.

DIPHTHERIA, WHOOPING COUGH AND TETANUS

432 children completed a course of the triple vaccine.
500 children received a reinforcing dose of the vaccine.

TETANUS ONLY

59 children received a reinforcing dose of this vaccine.

SMALL-POX VACCINATION

14 children were vaccinated in 1972.
1 child was re-vaccinated during the year.

RUBELLA (GERMAN MEASLES) VACCINATION

231 female school children between the ages of 11-13 years were given the single dose injection.

B.C.G. (TUBERCULOSIS) VACCINATION

500 children, boys and girls, were offered testing and vaccination if necessary, in 1972.

487 parents consented to testing and vaccination.

465 were skin tested, of which 416 children were found to be negative and as a consequence were vaccinated. 49 children were found to be positive and were X-rayed - no child was found to have Tuberculosis.

CHIEF PUBLIC HEALTH INSPECTOR

FOR THE YEAR 1971

Health Department
Arnd Hill Park,
Armside.

To the Chairman and Members of the Council

Mr. Chairman, Ladies and Gentlemen:

I have pleasure in presenting my Report for the Year 1971.

SECTION II

SANITARY CIRCUMSTANCES OF THE AREA

WATER

The supply of the District from the water from the Nottingham Corporation, the supply has been satisfactory in quality and quantity, has no plumbic solvent action and no complaints have been received.

SWIMMING BATHS

The Public Baths have been well conducted under the able supervision of Mr. W. Watson, Baths Superintendent.

No complaints were received by the Health Department as to unsatisfactory hygiene conditions.

Samples of water submitted to the Public Health Laboratory for bacteriological contamination were satisfactory.

DRAINAGE AND SEWERAGE

Foul drainage from the whole of the built-up area of the Urban District is dealt with by the Nottingham Corporation at their disposal works, Stoke Newington.

RIVERS AND STREAMS

There are no rivers or streams within the District.

Some tributary streams drain the area:-

1. Gedling Road and Mapperley Confluence via Arm Vale Road and Thackeray's
2. Mapperley Road Confluence via Bentwell Avenue and Brookfield Road
3. Kingsway Confluence via Nottingham Road Recreation Ground
4. Edwinstown Road Confluence via Front Street and Nottingham Road
5. Rotherham Confluence via Mansfield Road to Jubilee Road.

All drainage into the Day Brook which in turn discharges into the River Trent at Easington in the City of Nottingham via the Valley Road Playing Fields.

CLOSET ACCOMMODATION

The position throughout the District generally is, in my opinion, entirely satisfactory in that a water carriage system operates to the extent of 100 percent.

No more than 6 Pail Closets remain in outlying parts of the District.

CESSPOOLS

There are approximately 70 cesspools in the outlying parts of the Urban District on the East, North East and Northern boundaries, where public sewers are not available. These are emptied by the Council on request twice a year (Spring and Autumn) at a charge of £1.50 per 800 gallons. An income of £583.00 was received during the year for emptying cesspools; expenditure was £567.00.

PUBLIC HEALTH ACT, 1936, SECTION 75(1) DUSTBINS

The system of replacing defective dustbins is as follows:-

Defective bins are reported by the refuse collectors; a letter is then sent to the owner requesting replacement of the defective bin. After a lapse of a reasonable time, a Statutory Notice is served on the owner giving him 28 days in which to provide same. 14 Statutory Notices were served during the year and 1 dustbin supplied in default.

Unsatisfactory containers such as wash-tubs, drums, etc, appear from time to time. Where this happens, the premises are visited and the substitute receptacle is ultimately replaced for one of an approved pattern.

Two hundred and twenty two new dustbins were provided at 20 private premises, 199 Council Houses and other Council premises. 20 Preliminary Notices were served.

Laboratory Facilities

The Public Health Laboratory, being the laboratory for the Notts. Area, under the Public Health Laboratory Service, carried out the following examinations.

Milk	Phosphatase Test, Methylene Blue Test Bacteriological etc.
Ice Cream	Methylene Blue Test, Grading, etc.
Food	Bacteriological examination of foodstuffs
Water	Bacteriology of water
Pathological Specimens	Bacteriology and pathology of swabs, sputa, etc.

The laboratory carries out many other functions but the above are the main ones the Department is likely to require. The service is a most excellent one and is available to the Medical Profession.

City Analyst's Laboratory

Similar examinations to the above are carried out in respect of milk, ice-cream and water. The laboratory is also able to carry out chemical analysis of food. Mr. E.R. Fogden is an official analyst for the purpose of the Food & Drugs Act, 1955.

Ice Cream (Heat Treatment) Regulations, 1959

All premises in which ice cream is stored and sold have been subject to regular inspection and all conform to the regulations.

93 premises are registered in the District for storage and sale of ice cream, 4 of which were registered in 1972.

Food & Drugs Act, 1955

Part 1 : Sections 16 and 18

There is one factory registered for the manufacture of, for the purpose of sale, of ice-cream.

Sampling is regularly carried out - all samples have been Grade 1.

MEAT INSPECTION

This work continues to be a major operation not only in importance but in the amount of time taken up by the technical staff of the Department.

The service was fully maintained throughout the year and one hundred per cent meat inspection was carried out at the one slaughterhouse in the District, that of Messrs. S. Hackett Limited, 15 Mansfield Road, Daybrook.

The following animals have been inspected during the period 1st January to the 31st December, 1972.

Beasts	10,554
Calves	14
Pigs	37,248
Sheep	39,819
						<u>88,075</u>

The charges made for this service amounted to £3,313.44.

OVERTIME

During the year overtime has been worked by the Inspectors on a number of occasions.

The main overtime being Monday evenings, a few Saturday afternoons and Sunday mornings, especially after Bank Holidays.
